

BizCode Barcode Generator for RDLC Report

[Barcode Generator for RDLC Report](#) is a mature .NET component, allowing you to easily add barcoding features to your RDLC Client Reports. More than 20 most popular linear, postal & 2D barcodes are compacted within one single barcode solution.

Barcode Generator for RDLC completely supports .NET Framework 2.0/3.0/4.0 and can be 100% integrated with Microsoft SQL Server 2005, 2008 and 2010. For different language programmers, Visual C#, VB.NET, Managed C++ and Borland Delphi for .NET are supported.

Once this Local Client Report Barcode Generator is installed, users do not need to use other barcode font or tools. Multiple barcode option are provided to adjust module size, wide-to-narrow ratio, barcode height & width, image rotation angle, resolution in dpi and more, if you want to customize your generated barcodes.

Requirments:

- Windows operating system
- .NET 2.0, 3.0, 3.5, 4.0 and above
- Microsoft Visual Studio 2005/2008/2010 and later versions
- Microsoft SQL Server 2005/2008/2010
