BizCode Barcode Generator for Crystal Report

Barcode Generate for Crystal Report is a professional .NET DLL Class Library, which provides an easy way for developers to add advanced barcode printing capability into Crystal Reports for .NET projects. No barcode fonts or any third party tools are required.

Barcode Generate for Crystal Report is designed to work with the most popular .NET development tool - Microsoft Visual Studio. It can be perfectly integrated within Visual Studio 2005/2008/2010 (Professional Edition & Standard Edition), and support programming in Visual C# and VB.NET code.

With **Barcode Crystal Report Generator**, developers can customize barcodes image quality, rotation angle, x-dimension, captions, customer defined resolution and more. Beside, multiple image formats, including Png, Gif, Jpeg, Bmp, Tiff and more are provided for saving and exporting generated linear, 2D barcodes.

Requirments:

- Windows operating system
- .NET 2.0, 3.0, 3.5, 4.0 and above
- Microsoft Visual Studio 2005/2008/2010 and later versions
- Microsoft SQL Server 2005/2008/2010
